MEMORANDUM FOR: Director, Office of Medical Services

ATTENTION: Training Officer

FROM:

[REDACTED]  
Chief, Administrative Staff, ICS

SUBJECT: Request for CPR Training

1. In January 1982, we contacted [REDACTED] who at the time was with the Office of Medical Services (OMS), regarding CPR training for Intelligence Community (IC) Staff employees. [REDACTED] agreed that because there are no OMS personnel at [REDACTED] some of our employees should receive medical training in order to provide emergency, on the scene first aid until professional medical help can be obtained through normal channels. [REDACTED] He added that an OMS course in this area would be available to Agency components in May 1982. [REDACTED] recommended that we forward an official request to OMS for such training in May 1982.

2. Based on [REDACTED] suggestion, we request an OMS training course [REDACTED] for 10-12 employees at the earliest possible convenience. Specifically, we would like to train our employees in emergency first aid, CPR, and the use of the Robert Shaw Device, one of which is available [REDACTED] We are also open to any other suggestions you may have regarding training which may be beneficial to our employees.

3. Your cooperation in responding to this request will be greatly appreciated. Please refer any questions to our Security/Safety Officer, [REDACTED]
